Actual Spendings

Total Regional Overspend

Term	Definition
Budget -	The amount allocated for a specific department, category, region, or period.
Actual Spending -	The amount actually spent during the period.
Budget Variance (BV) -	The difference between Actual Spending and Budget. Positive values indicate overspending, while negative values indicate spending below budget.
Variance % -	The budget variance expressed as a percentage of the allocated budget.
Overspend	The amount by which actual spending exceeds the allocated budget.
Under Budget -	When actual spending is lower than the allocated budget.
Department -	The organizational unit responsible for the expenditure.
Expense Category -	The type of expenditure, such as Salaries, Travel, Utilities, Training, Marketing, or Infrastructure.
Region	The geographical area associated with the expenditure.
Budget Performance -	How actual spending compares with the allocated budget.
FY	Fiscal year. In this analysis, the reporting period covers 2021–2023.
Top 5 Overspend -	The five periods or department-category combinations with the largest budget overruns.
₦M (Millions) -	Amounts displayed in millions of Nigerian Naira for readability.

Business Value

The analysis transforms raw financial transactions into a structured view of where, when and why budget overruns are occurring.

Rather than focusing only on total spending, the analysis provides management with multiple levels of visibility, from overall performance to specific department-category combinations and regional drivers.

This supports more targeted budget monitoring, cost control and future budget planning.

Conclusion

The company exceeded its allocated budget by ₦94.8M across the three-year period. Overspending was widespread, with Marketing, Salaries and the East region emerging as key areas requiring attention.

The analysis indicates that improving budget performance will require both stronger expenditure monitoring and a review of whether current budget allocations accurately reflect operational spending requirements.
